SUMMARY

I build full-stack web applications with React, JavaScript, and C#/.NET. At Nashville Software School, I shipped multiple projects, including [portfol.io](#) - a deployed React app that lets artists take commissions directly from a portfolio page without requiring guest accounts. My experience as a graphic designer means that I think about UI, accessibility, and the user before I write a line of code. I'm looking for a junior or entry-level front-end or full-stack developer role where I can keep shipping and bring a strong design eye to every feature I build.

EXPERIENCE

Software Developer Apprentice — Nashville Software School

February 2026 – Present · Nashville, TN

- Built and deployed multiple full-stack applications using React, JavaScript, C#, .NET, Python, and Django through intensive project-based training
- Collaborated in Agile teams using Git/GitHub for version control, code review, and project management with GitHub Projects and issue tracking
- Developed accessible, responsive UIs applying design background to create cohesive user experiences with React, HTML5, CSS3, SASS, and Bootstrap
- Implemented server-side, test-driven development with Python, Django, and SQL; built RESTful APIs with full CRUD functionality
- Automated build tasks with Grunt including linting (JSHint), module bundling (Browserify), and SASS compilation

Peer Support Mentor — The Arc TN

October 2025 – Present · Remote | Nashville, TN

- Manage and track individualized goal progress across multiple mentees with intellectual or developmental disabilities, applying structured data organization, prioritization, and progress reviews to continuously reassess and adapt plans
- Facilitate weekly meetings to develop initiatives and support life goals, applying cultural competency and advocacy principles

Contract Graphic Designer — Image360

April 2021 – August 2021 · Hendersonville, TN

- Designed and coordinated pre-press production for advertising wraps, healthcare signage, product packaging, and medical office signage using Adobe Creative Suite and Autodesk Civil 3D
- Created user-experience and user-interface oriented design work for websites, apps, and emails under high-pressure deadlines

Animatronic Intern — Animax Designs, Inc.

January 2020 – April 2020 · Hybrid | Nashville, TN

- Built cross-platform file conversion pipelines between Maya, Adobe Illustrator, and CorelDRAW to produce laser-cut fabrication assets from licensed IP projects, maintaining fidelity through UV mapping and manual vector tracing
- Collaborated cross-functionally with engineering, design, and management teams to coordinate asset delivery timelines, translating technical requirements between departments to ensure fabrication accuracy on licensed IP projects

General employment during schooling — Serving, Retail & Creative Industries

January 2018 – December 2024 · Nashville, TN and Bradenton, FL

- Simultaneously held two part-time roles across serving, retail, and creative industries to self-fund education through community college and a bachelor's degree
- Demonstrating strong work ethic, time management, and a self-motivated drive with the ability to manage competing priorities under pressure

PROJECTS

portfol.io — [Code base](#) · [Live Demo](#)

Full-stack React app enabling artists to accept commission requests from guest visitors without account creation, designed for easy sharing via business card or bio link

- Designed and built a single-page application from scratch, letting artists create, edit, and manage commission listings with active/inactive status, custom tags, and sortable guest inquiries
- Built a RESTful API supporting full CRUD functionality for commission and profile management
- Stack: React, JavaScript, Vite, Tailwind CSS, HTML5, JSON, Git/GitHub

Tabloid — [Client](#) · [API](#)

Content management system enabling users to create accounts and publish articles for public consumption, built by a 3-person team

- Implemented the majority of the front end, including fetch calls and API integration, connecting the UI to the back end and styling the application end-to-end
- Contributed to back-end development, using Entity Framework Core and LINQ to query and manipulate application data
- Stack: React, JavaScript, CSS, HTML, C#, .NET, EF Core, RESTful APIs, Git/GitHub

Exomine — [Client](#) · [API](#)

Solar system mining marketplace single-page application built by a 3-person team where governors select and purchase minerals for space colonies

- Built interactive dropdown and radio button components with persistent state management, integrated with a live API
- Implemented responsive back-end API connectivity to support real-time data updates
- Stack: React, JavaScript, CSS, HTML, C#, .NET, EF Core, RESTful APIs, Git/GitHub

SKILLS

Technical: JavaScript, React.js, HTML5, CSS3, C#, .NET, Python, Django, SQL, Git/GitHub, Node.js, RESTful APIs, SASS, Bootstrap, Tailwind CSS, Vite, Adobe Creative Suite

Domain: UI/UX design, Accessible design, Responsive design, Typography

Strengths: Problem-solving, Communication, Collaboration, Time management, Agile teamwork

EDUCATION

Full-Stack Software Development Bootcamp — Nashville Software School

2026

Bachelor of Commercial Illustration — Nōssi College of Art and Design

2021

Associate of Arts — State College of Florida

2018
